

about, the throwback provision. Now this is quite important, and I'm hoping that some of you will come to me during the interim, between General File and Select File, and we can talk about throwback, and I'll try to explain it briefly in the time that I have, to see whether we might want to put an amendment on on Select File to implement the elimination of the throwback provision, because the throwback provision will affect those of you throughout this state that have companies in your district that do sales, do business with...
